

Omobolaji Alabi

681-238-8329 | ooa310@nyu.edu | www.linkedin.com/in/omobolaji-alabi | github.com/SlinkyWalnut

EDUCATION

New York University | New York, NY

Bachelor of Science in Computer Engineering, Minor in Mathematics

Expected graduation date: May 2026

GPA: 3.7

EXPERIENCE

Google

Incoming Software Engineer

Aug. 2026

Seattle, Washington

Google

Software Engineering Intern

May 2025 – Aug. 2025

Seattle, Washington

- Worked on Cloud Service Mesh Team
- Designed and created batch job that would alert team if a mesh configuration was no longer eligible for migration
- Added automatic migration blocking for ineligible configurations
- Used Golang, gRPC, and Google SQL

Google

Student Training in Engineering Program Intern (STEP)

May 2024 – Aug. 2024

Sunnyvale, California

- Worked on Gmail Backend Security team
- Designed and created a back end tool that automates the rotation of certain Gmail security keys using Java
- Used internal apis, rpcs, and created borg jobs to create code changes automatically in Gmail's codebase
- Created mock server to test methods instead of connecting to Google's live version control server

Amazon

Software Development Engineer Intern

May 2023 – Aug. 2023

Bellevue, Washington

- Worked on the Supply Chain Optimization Technology, Inventory Planning and Control, Simulation Team
- Full-stack development of internal tool used by data scientists to test the accuracy of supply chain simulation runs and visualize data, using React, DynamoDB, and S3
- Added more than 150 inventory metrics to tool from simulation runs that would be tested across simulations to find inconsistencies

PROJECTS AND LEADERSHIP

Robotic Design Team, New York University

Software Engineer

Fall 2024 – Current

New York, New York

- Worked on Robot Operating System(ROS) Gazebo simulations so that we could test our robot's software before it was physically built
- Led community outreach efforts with robotics team by organizing and teaching interactive STEM workshops for elementary school students, promoting early engagement in robotics and technology

Headstart Fellowship

Mentor

Aug. 2024 – Aug. 2025

- Provide one-on-one mentorship for a highly selective fellowship program which focuses on professional development for underclassmen in the areas of Finance, Consulting and Technology
- Work closely with my mentees, furthering their professional development through comprehensive coaching and the completion of tangible deliverables

Fast Facts | <https://github.com/SlinkyWalnut/Divhacks-repo>

Oct. 2025

- Won Entertainment Track and Opik sponsor track with a prize of \$5000 at Columbia's annual Hackathon
- Created real time fact verification desktop application using a multi agentic workflow
- Used a Model Context Protocol to give our agents the ability to surf the web and use the most recent data when cross referencing

LockIn | <https://github.com/blackbirde71/alleyesonme>

June 2024

- Used hume api to identify user emotions and then determined whether users were paying attention
- Transcribed lecture when users weren't paying attention then used this data to tell students what they missed
- Created data visualization that showed user how often they were paying attention to a lecture

FoodHub | <https://github.com/WillPelech/AxolotlDatabaseProject>

Feb. 2025 – April 2025

- Worked with a team of 3 other student in my databases class to create a web-app for food reviewing
- Used Google Maps api to dynamically show all of the restaurants a user has visited and reviewed on a map by querying our database
- Implemented several different layers of database security such as user views, authentication tokens, and password hashing

TECHNICAL SKILLS AND HOBBIES

Languages and Frameworks: C++, Java, JavaScript, Typescript, HTML/CSS, Python, Golang, Lean, React, Flask, Verilog, ROS, Linux, OpenAI API, Google Maps API, Latex, SQL

Developer Tools: Git, Google Cloud Platform, Amazon Web Services, MongoDB, Kubernetes, Service Mesh

Hobbies: Basketball, Chess, Volleyball, Baking Cheesecake, Weight Lifting, Poker, Pickleball, Jiu-Jitsu, Bouldering
