EDUCATION

New York University | New York, NY
Bachelor of Science in Computer Engineering

Expected graduation date: May 2026

EXPERIENCE

Google Sep. 2026
Incoming Software Engineer *Seattle, Washington*

Stealth Startup Feb. 2026 - Current
Software Engineer *New York, New York*

- Fifth engineer at startup with VC funding
- Added android native code for consumer social media ap and implemented automatic submission to Play Store

Google May 2025 – Aug. 2025
Software Engineering Intern *Seattle, Washington*

- Worked on Cloud Service Mesh Team
- Designed and created batch job that would alert team if a mesh configuration was no longer eligible for migration
- Added automatic migration blocking for ineligible configurations
- Used Golang, gRPC, and Google SQL

Google May 2024 – Aug. 2024
Student Training in Engineering Program Intern (STEP) *Sunnyvale, California*

- Worked on Gmail Backend Security team
- Designed and created a back end tool that automates the rotation of certain Gmail security keys using Java
- Used internal apis, rpcs, and created borg jobs to create code changes automatically in Gmail's codebase
- Created mock server to test methods instead of connecting to Google's live version control server

Amazon May 2023 – Aug. 2023
Software Development Engineer Intern *Bellevue, Washington*

- Worked on the Supply Chain Optimization Technology, Inventory Planning and Control, Simulation Team
- Full-stack development of internal tool used by data scientists to test the accuracy of supply chain simulation runs and visualize data, using React, DynamoDB, and S3
- Added more than 150 inventory metrics to tool from simulation runs that would be tested across simulations to find inconsistencies

PROJECTS AND LEADERSHIP

Tech@NYU Tech Treks Feb. 2026 - Current
Product Manager *New York, New York*

- Lead a team of four to create their first technical project
- Provided technical guidance, product insight, and general domain advice

Robotic Design Team, New York University Fall 2024 – Current
Software Engineer *New York, New York*

- Worked on Robot Operating System(ROS) Gazebo simulations so that we could test our robot's software before it was physically built
- Led community outreach efforts with robotics team by organizing and teaching interactive STEM workshops for elementary school students, promoting early engagement in robotics and technology

Headstart Fellowship Aug. 2024 – Aug. 2025
Mentor

- Provide one-on-one mentorship for a highly selective fellowship program which focuses on professional development for underclassmen in the areas of Finance, Consulting and Technology
- Work closely with my mentees, furthering their professional development through comprehensive coaching and the completion of tangible deliverables

Fast Facts | <https://github.com/SlinkyWalnut/Divhacks-repo> Oct. 2025

- Won Entertainment Track and Opik sponsor track with a prize of \$5000 at Columbia's annual Hackathon
- Created real time fact verification desktop application using a multi agentic workflow
- Used a Model Context Protocol to give our agents the ability to surf the web and use the most recent data when cross referencing

TECHNICAL SKILLS AND HOBBIES

Languages and Frameworks: C++, Java, JavaScript, Typescript, HTML/CSS, Python, Golang, Lean, React, Flask, Verilog, ROS, Linux, OpenAI API, Google Maps API, Latex, SQL, Arduino, React Native

Developer Tools: Git, Google Cloud Platform, Amazon Web Services, MongoDB, Kubernetes, Service Mesh, Expo Application Services, Maestro

Hobbies: Basketball, Chess, Volleyball, Baking Cheesecake, Weight Lifting, Poker, Pickleball, Jiu-Jitsu, Bouldering
